

BELLO ABDULRAHMAN A.

CYBERSECURITY

Lagos, Nigeria.

(+234) 9121438248

extrobell@gmail.com

<https://www.linkedin.com/in/abdulrahman-bello>

KEY SKILLS

- Network security fundamentals(TCP/IP, Firewalls,VPNs)
- Security monitoring &SIEM Basics
- Log Analysis and incident Response
- Network Tools (Wireshark, Nmap)
- Communication and documentation

EDUCATION

BACHELOR'S DEGREE

B.Sc. cybersecurity al-hikmah university Ilorin
2024- Present
Graduation year : [2028]

CERTIFICATE

International school
university of Lagos 2021
Western African
examination council

CERTIFICATE

Introduction to
cybersecurity cisco
2023

PROFESSIONAL PROFILE

Motivated cybersecurity undergraduate at Al-Hikmah University with hands-on exposure gained through a three-month internship at the Network Operations Center (NOC), University of Ilorin, supporting network monitoring, incident response, and day-to-day security operations for critical campus infrastructure. Quick learner with a solid grasp of network fundamentals, log analysis, vulnerability management, and a strong drive to grow into a security analyst role. Reliable, detail-oriented, and eager to apply technical skills in a real-world security environment.

PROFESSIONAL EXPERIENCE

PROJECT COORDINATOR CYBERSECURITY INTERN [AUGUST 2025] - [NOVEMBER 2025] (3 MONTHS)

Network Operations Centre (NOC), University of Ilorin | Ilorin, Nigeria

- Monitored network traffic, system logs, and security dashboards to identify anomalies and potential security incidents across campus infrastructure.
- Assisted senior engineers with configuring and maintaining firewalls, routers, and switches to safeguard network integrity.
- Supported intrusion detection/prevention system (IDS/IPS) monitoring and helped triage and escalate security alerts.
- Participated in incident response activities, documenting findings and contributing to post-incident reports.
- Carried out routine vulnerability scans and assisted with patch management on networked systems.
- Tracked uptime and performance of critical network services using monitoring tools (e.g., Wireshark, Nmap), helping maintain over 95% network availability.
- Supported end users and the helpdesk team with network connectivity and security-related issues.
- Gained practical experience with tools such as Wireshark and Nmap for traffic analysis and network reconnaissance.

Skills & Knowledge Gained

- Practical understanding of how a campus-wide network is monitored and secured in a live, 24/7 environment.
- Hands-on exposure to tools such as Wireshark, Nmap, and Zabbix/Nagios for traffic analysis and monitoring.
- Strengthened knowledge of TCP/IP, firewall rule management, and intrusion detection/prevention concepts.

Achievements

- Contributed to maintaining over 95% uptime of monitored network services during the internship.
- Commended by supervisor for reliability, quick learning, and attention to detail in daily NOC operation
